ABOUT

TerraFirma

Serious 4x4 Accessories

Born from a love of adventure and a deep connection with Land Rover vehicles, TerraFirma was launched in 2007 by Allmakes 4x4, one of the world's most respected suppliers of Land Rover parts and accessories.

With over three decades of expertise behind it, Allmakes 4x4 set out to create a dedicated brand for those who live for exploration; a brand built on performance, reliability, and the freedom to go further.

From the very beginning, TerraFirma has stood for serious 4x4 capability. Every product is engineered to enhance a vehicle's strength, endurance, and versatility, from suspension systems, protection equipment, and recovery gear to lighting, winches, and expedition essentials. Each component is designed, developed, and tested in real-world conditions to meet the demands of enthusiasts, professionals, and overlanders who rely on their vehicles in the harshest environments.

What started as a small range of upgrades quickly evolved into a globally recognised brand, trusted by Land Rover

owners and off-road drivers in more than 100 countries.

Whether crossing deserts, climbing mountain passes, or navigating remote trails, TerraFirma products are built to perform, combining practical design with proven durability.

Behind every TerraFirma product lies a commitment to quality and customer confidence. Supported by Allmakes 4x4's ISO-certified processes, TerraFirma provides Certificates of Conformance where required, ensuring every component meets the highest standards of safety, performance, and traceability.

This dedication to quality is part of what makes TerraFirma a trusted partner to workshops, distributors, and adventurers worldwide.

Today, TerraFirma continues to push boundaries, developing innovative solutions that allow drivers to explore with confidence and embrace new challenges without limits.

Serious 4x4 Accessories for Serious Adventure.

OUR SHOCK ABSORBERS

Correct selection of replacement shock absorbers is critical in maintaining or improving your Land Rover's suspension.

Shocks provide stability when cornering, braking and maintain safe handling characteristics when driven hard, while towing and when heavily loaded. They also eliminate bounce and vibration improving driver and passenger comfort.

Extended travel shocks allow for greater axle movement making sure the tyres stay in contact with the ground for maximum traction and control.

All Terrain
'A great all rounder'
Construction: Twin Tube
Length: Standard

Commercial HD
'Our toughest shock in the range'
Construction: Twin Tube
Length: Standard

Monotube High Performance
'Most refined and responsive shock yet'
Construction: Monotube
Length: Standard Plus 2" / 5"

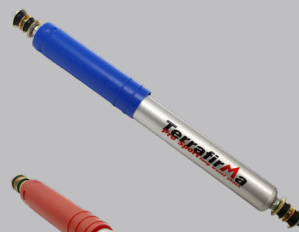

8 Stage Adjustable Remote Reservoir Monotube
'Super high performance with 8 stages of damping'
Construction: Monotube
Length: Standard Plus 2" / 5"

Mega Sport Monotube
'The ultimate 4x4 shock absorber'
Construction: Monotube
Length: Plus 11"

2.5" Smooth Body Competition
'The ultimate 4x4 shock absorber'
Construction: Monotube
Length: Plus 12"

Pro Sport
'For Serious Off-Roading'
Construction: Twin Tube
Length: Standard Plus 2"

4 Stage Adjustable
'Pro Sport plus 4 stages of damping'
Construction: Twin Tube
Length: Standard Plus 2" / 3" / 5"

EXPLAINED: TWIN TUBE VS MONOTUBE

Twin Tube Shocks use an inner and outer chamber with oil and nitrogen gas. They are durable, cost-effective, and well suited to all-round use, especially for vehicles that see varied loads and terrain. Lower nitrogen pressure provides a more comfortable ride, and the design tolerates minor body damage without affecting piston operation. However, they offer reduced heat dissipation, must be mounted close to vertical, and can suffer from oil aeration under extreme use.

Monotube Shocks feature a single chamber with separated oil and high-pressure nitrogen, divided by a floating piston. This eliminates aeration, improves heat dissipation, and allows more precise valving and larger piston diameters for greater responsiveness. They can be mounted at any angle and perform better in extreme off-road conditions. They typically provide a firmer ride, and potential performance impact if the shock body is damaged.

SUSPENSION EQUIPMENT

Even the best factory-built 4x4 vehicles involve compromises. Manufacturers must design one vehicle to suit many different uses.

Terra Firma suspension systems allow you to customise your vehicle to meet your specific needs. This may include improving load carrying, supporting additional equipment, increasing wheel travel, or improving on-road handling.

With such a wide range of options and combinations available, a Terra Firma suspension upgrade can greatly reduce the compromises of standard suspension. This allows your suspension system to be tuned to perform exactly as you require.

Terra Firma shock absorbers, coil springs, and suspension components are designed for a wide range of applications. These include recreational use, expedition and competition off-roading, commercial and utility vehicles and towing use. They are also ideal for replacing worn or tired original suspension parts.

Terrafirma suspension components are tried and tested in every application

Photo Credit: Dirt Nationals

**OFF-ROAD COMPETITION
& CUSTOM SUSPENSION**

Terrafirma are experts in supplying suspension components for off-road competition vehicles and bespoke custom builds. Drawing on extensive experience in extreme environments, we provide high-performance solutions designed to maximise suspension travel, durability and precise damping control.

Beyond conventional lift kits, Terrafirma supports serious off-road competitors and custom vehicle builders. The range extends to fully adjustable, rebuildable racing shocks, air shocks for extreme articulation, external bypass dampers and hydraulic bump stops.

These products are designed for custom chassis and high-performance builds where suspension travel, damping precision and impact control are critical. Adjustable valving and nitrogen charging allow fine tuning for specific terrain and competition demands.

Air Shocks

Bypass Shocks

Hydraulic Bump Stops

COILOVERS

Terrafirma coilovers combine spring and shock into one high-performance unit, offering greater adjustability than conventional suspension systems. Designed for competition and custom builds, they allow precise tuning of ride height, spring rates and damping to suit vehicle weight and terrain.

2.0" or 2.5" Coilovers

8 Stage Adjustable available

12", 14" & 16" travel options

Extensive selection of coil springs

COIL SPRINGS

Terrafirma coil springs are engineered to improve load carrying, travel, stability and off-road capability while maintaining smooth on-road handling.

Designed to typically provide around a 2" lift for optimal performance without compromising safety, they allow increased articulation, larger tyre fitment and improved approach and departure angles.

The range includes standard replacement, heavy-duty, lift and lowered options to suit different vehicle builds and driving styles.

SPRING & SHOCK KITS

Created for convenience, Terrafirma spring and shock kits ensure that correct parts are matched making ordering easier. The kits are available in standard and +2" travel, and include All Terrain, Pro Sport or Monotube shock absorbers.

AIR TO COIL CONVERSION KITS

Avoid costly EAS failure with an air to coil conversion kit from Terrafirma.

Available for:

- Range Rover P38
- Range Rover Sport 2005 - 2010
- Discovery 2
- Discovery 3
- Discovery 4

ANTI ROLL BARS

Reduce body roll and increase stability with Terrafirma anti roll bars.

Commonly used on lifted, heavily laden, commercial or expedition vehicles.

ON EACH PAGE YOU WILL FIND A QR CODE TO TAKE YOU DIRECTLY TO THE WEBSITE CATEGORY.

SUSPENSION HARDWARE

Designed to enhance off-road capability by increasing wheel travel and axle articulation while maintaining stability and balance. The range of suspension hardware helps address common issues such as clearance, shock travel and suspension geometry, allowing drivers to customise their suspension for improved performance across all types of terrain.

SUSPENSION BUSH KITS

Improve steering control, tyre grip and stability with Terraforma Bush Kits

- Polyurethane suspension bushes
- High load bearing capacity

POLYURETHANE BUSHED SUSPENSION ARMS

Easier servicing with suspension arms pre-fitted with polyurethane bushes.

Available for:

- Range Rover Sport 2005 - 2013
- Discovery 3 & 4

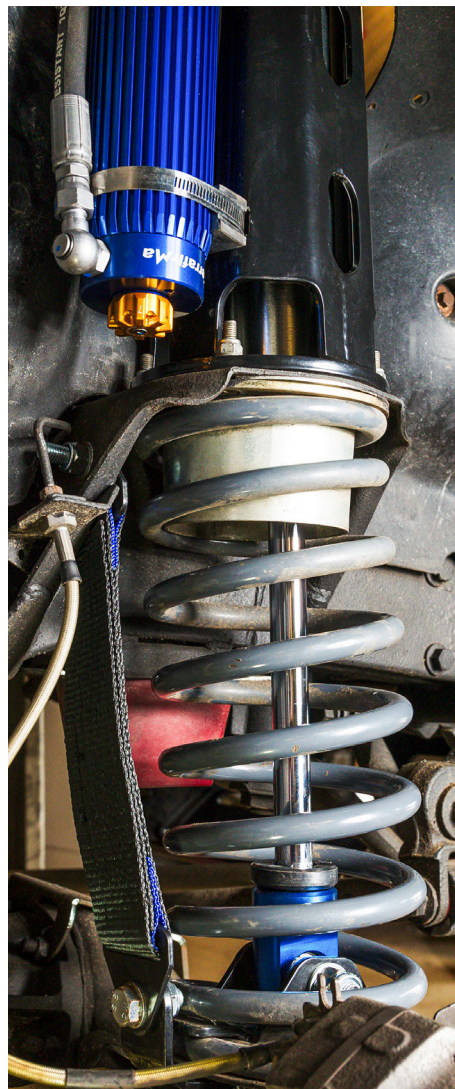

Photo Credit: Halil Faith Cetin

STEERING EQUIPMENT

A vehicle's steering system is critical for control, safety and driver confidence. In demanding off-road environments, steering components are subjected to far greater forces than in normal road driving.

Larger tyres, rough terrain and heavy impacts can quickly expose the weaknesses of standard steering components, leading to reduced accuracy, premature wear or even component damage.

Terrafirma offers a comprehensive range of steering components designed specifically for Land Rover and 4x4 applications.

Engineered to improve strength, durability and steering precision, the range supports everything from standard vehicle maintenance to heavy-duty off-road and expedition builds.

With upgraded materials, reinforced designs and improved serviceability, Terrafirma steering components help ensure reliable performance in harsh environments while maintaining precise and predictable handling on the road.

STEERING DAMPERS

- Reduce vibration
- Improved vehicle control
- Multi-stage damping
- Latest Cellular foam technology

Our Range

- Terrafirma Steering Damper
- 4 Stage Adjustable Steering Damper
- Return to Centre Steering Damper

ADJUSTABLE PANHARD RODS

- Restores steering geometry
- 30mm, 5mm wall thickness high tensile steel tube
- With polyurethane bushes

Our Range

- Defender 90 / 110 / 130
- Discovery 1 & 2
- Range Rover Classic

STEERING RODS

- 30mm diameter steel
- Supplied with track rod ends
- Heavy duty

Our Range

- Defender 90 / 110 / 130
- Discovery 1 & 2
- Range Rover Classic

WAVY CROSS DRILLED AND GROOVED BRAKE DISCS

Terrafirma wavy cross drilled and grooved brake discs are designed to improve braking performance while giving your vehicle a distinctive performance look.

- Improved braking response and durability
- Wavy edge helps clear mud and debris
- Cross drilling and grooves improve initial bite from cold
- Allows gases, dust and water to escape from between the pad and disc
- Corrosion-resistant coating on non-friction surfaces

PERFORMANCE BRAKE PADS

- Designed for stronger and more consistent braking performance.
- Advanced friction materials improve stopping power and pedal response.
- Maintain performance under heavy loads, towing or demanding off-road conditions.
- Engineered to balance braking performance, durability and heat resistance.

PREMIUM CERAMIC BRAKE PADS

- Significantly reduce brake dust and noise and extend your brake disc life.
- Produce finer, lighter coloured brake dust which does not stick to wheels.
- Stable under a wide range of temperatures for consistent performance.
- Longer lifespan than organic or semi metallic brake pads.

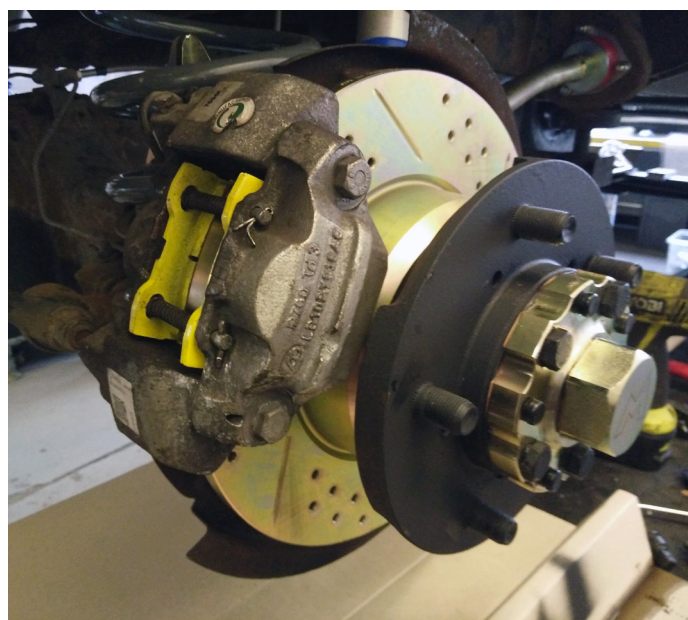

CROSS DRILLED AND GROOVED BRAKE DISCS

Terrafirma cross drilled and grooved brake discs offer increased bite from cold and excellent fade resistance.

- Run cooler and minimise fade
- Perfect for heavily laden expedition vehicles
- Cross drilling and grooves improve initial bite from cold
- Allows gases, dust and water to escape from between the pad and disc
- Work well with larger tyres that require extra brake pedal pressure

Upgrading your brakes can deliver a range of benefits beyond simply reducing stopping distance.

Terrafirma works with leading manufacturers to offer brake upgrades that improve overall braking performance, safety and reliability, while also enhancing the appearance of your vehicle.

Options are also available to upgrade components such as the Defender handbrake, providing a more complete braking solution.

Higher quality brake components are designed to last longer and perform more consistently under demanding conditions.

Whether you want improved pedal feel, better braking performance when towing or carrying heavy loads, or reduced brake fade during hard use, Terrafirma brake upgrades help deliver stronger, more confident stopping power.

BRAKING | EQUIPMENT |

TERRAFIRMA QUALITY BRAKING COMPONENTS WILL LAST LONGER AND PERFORM BETTER

STAINLESS STEEL BRAKE HOSES

- Improve pedal feel and braking response
- Designed to withstand harsh off-road environments
- Extended versions

BRAKE UPGRADES

Available for:

- Defender 90 / 110
- Discovery 3 & 4
- Range Rover Sport 2005-09

Also available is a handbrake disc kit for a more reliable handbrake.

ROCK SLIDERS

Terrafirma Rock Sliders are a must-have for both recreational and serious off-roaders. In a variety of design options, our rock sliders follow the profile of the original side sill.

- Heavy-duty construction allows them to double as jacking points
- Protect sills and lower bodywork from rocks & trees.
- Optional "tree bars" provide additional side protection and usability as side steps

Available in the following designs:

With / Without Tree Bars

TRED / Skeleton / Baja Raid

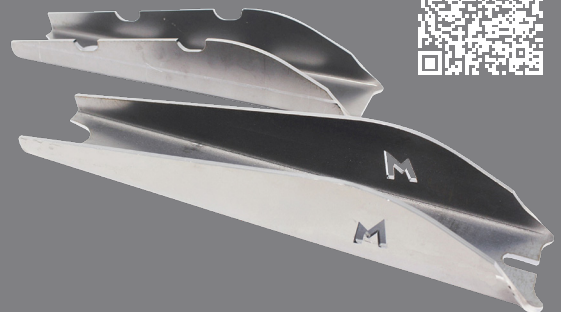

| TRED Rock Slider

| Skeleton Rock Slider

AXLE REINFORCING KIT

- Prevent damage to the axle which can cause wheel alignment problems
- Front and rear kits available
- Available for Defender 90 / 110 / 130 / Discovery 1 & 2 / Range Rover Classic

ROLL CAGES

- Designed with safety, function and aesthetics in mind
- Exterior and interior mount options
- No welding required

Protection & Performance roll cages provide roll over protection for popular Defender applications.

REAR STEP TOW BARS

Rear Step Tow Bars are the classic accessory first manufactured in the mid-90s for Defender's export to the US.

- Tow bar option available
- Built in jacking points
- Choice of tow bar height
- TRED plate step available

| TF883KIT90

Terrafirma protection equipment is designed to safeguard the underside and vulnerable bodywork of your vehicle during off-road use, where rocks, ruts and rough terrain can easily cause damage.

As off-road demands increase, additional protection becomes essential to maintain reliability and avoid costly repairs.

The Terrafirma range of underbody guards protects key components including steering, differentials, transmission systems and fuel tanks, as well as exposed areas such as sills and rear corners.

Manufactured from durable steel or lightweight aluminium, these guards balance strength, weight and style, while corrosion-resistant finishes ensure long-lasting, practical protection for all levels of off-road driving and expedition.

PROTECTION | EQUIPMENT |

UNDERBODY GUARDS

Steering Guards

Protect steering components and sump areas from impact while maintaining airflow and clearance.

Differential Guards

Heavy-duty protection for front and rear differentials, preventing costly damage from rocks and obstacles.

Transmission Guards

Shield gearbox and transfer box components from grounding and harsh terrain.

Fuel Tank Guards

Protect exposed fuel tanks from punctures and impact damage in extreme conditions.

Fuel Cooler Guards

Compact protection for vulnerable fuel coolers mounted along the chassis.

Track Rod Guards

Prevent bending or damage to steering linkages, maintaining control and alignment off-road.

REAR BUMPER CORNERS

- Protect the rear corner and lights
- Available for Defender 90 & 110
- Direct fit or Extreme version which requires modification.

TF0015 Skeleton Cranked Winch Bumper
TF3301 A12000 Electric Winch

TerraFirma

BUMPERS

Combining style and function, TerraFirma have expertly developed an extensive range of bumpers for Land Rover vehicles. Available for vehicles with or without AC and for winch and non winching purposes.

TUBULAR BUMPERS

- Very popular with both recreational and competitive off-roaders
- Specifically for Defenders

SKELETON BUMPERS

- Lightweight construction, stylish rally raid race styling and unique manufacturing process
- Specifically for Defenders

EXTREME BUMPERS

- Improved approach angle and provide excellent body protection
- Accommodates standard winch and TM12000 Twin Motor Winch
- Super strong, with recovery points and brackets

TRED BUMPERS

- Perfect combination of strength, clean lines and approach angle
- Unique punched and serrated aluminium tread plates
- Part of the TRED range

PRO TAPER BUMPERS

- Improved approach angle
- Winch is raised above the chassis rails
- Available for both standard and large frame winches

COMMERCIAL BUMPERS

- Perfect for those looking for a winch mount with additional protection
- 2 jacking points and 2 recovery points

HD TAPERED BUMPERS

- Perfect replacement for standard bumper
- Available with 2 chassis mounted recovery eyes and centre towing pin

RAID STYLE BUMPERS

- Improved approach angle, lightweight and super strong
- 6 point chassis mounted for maximum strength
- Front and rear bumpers available
- Specifically for Discovery 2s

DISCREET WINCH MOUNTS

- Allows a winch to be mounted while retaining the original vehicle looks
- Comprehensive kit included

RECOVERY | EQUIPMENT |

Recovery equipment is a critical part of any off-road vehicle setup. Whether tackling mud, sand, rocks or remote terrain, having the right tools ensures you can recover your vehicle safely and efficiently when traction is lost.

TerraFirma's recovery range is designed for strength, reliability and ease of use.

Covering everything from basic recovery essentials to heavy-duty solutions for extreme off-road conditions.

ELECTRIC WINCHES

The TerraFirma winch range has been expertly developed to provide maximum specification winches that are tried and tested in real world scenarios. With a variety of power and sizes there is a winch to suit your requirements from off-roading to search and rescue.

- TM12000 Twin Motor Electric Winch
- A12000 Electric Winch
- M12.5S 12V Electric Self-Recovery Winch
- X4000 Electric Winch
- T1000 Portable Pulling Tool

TF0028 TRED Bumper
TF3360 TM12000 Twin Motor Electric Winch

WINCHING AND RECOVERY ACCESSORIES

Recovery equipment is essential off-road kit. TerraFirma have an extensive range of equipment to ensure that safety is maintained when winching and recovering vehicles.

Our range includes:

- Towing & Recovery Points
- Ropes & Straps
- Shackles
- Snatch Rings
- Winch & Recovery Kits
- Hi-Lift Jacks
- TerraFirma Hydraulic Climbing Jack

View the whole range of products
on the Terrafirma website.

WHEELS

Our range of wheels are designed to enhance both the capability and appearance of your vehicle.

Whether for everyday driving, expedition use or extreme off-road conditions, the range offers durable, vehicle-specific solutions engineered to handle increased loads, larger tyres and harsh terrain.

Spare Wheel Covers

Tyre Pressure Monitoring Kit

Compressors & Tyre Repair

XL Wheel Clamp Protection

Stylish Steel & Alloy Wheels

WHEEL SPACERS

Terraforma 30mm wheel spacers give an additional 60mm track width.

- Improved handling, cornering and stability

ENGINE PERFORMANCE UPGRADES

Improve airflow, cooling and engine efficiency for better performance and reliability.

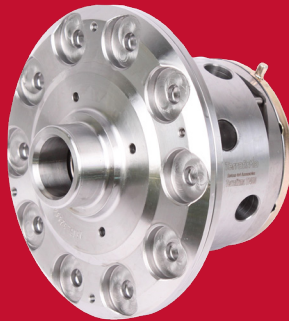

- Silicone Turbo and Intercooler Hoses
- Intercoolers
- EGR Removal Kits

TERRAFIRMA E LOCKERS

Provides instant traction by transferring drive equally to each wheel.

- Vastly improved traction with less need for momentum, reducing the potential of vehicle damage and environmental impact
- Simple operating system, no compressor or complicated wiring
- Fastest E Locker to install in the market
- Suitable for both front and rear axles

CLUTCH UPGRADE KITS

Heavy-duty one-piece flywheel, clutch and release bearing kit designed to outlast the original dual mass flywheel.

- Premier friction material gives longer life
- Self centring bearing provides smooth operation
- Intense quality control ensures fit first time
- Extensive testing determined the ultimate specification

FOAM AIR FILTERS

- Direct replacement for original paper element
- 30% more air flow
- Lifetime washable air filter

VEHICLE SCANNERS, DIAGNOSTICS & TRACKERS

Improve reliability and vehicle management with diagnostics and scanners.

- IID Tool
- TerraFirma Vehicle Tracker
- iCarsoft LR Scanner

Terrafirma performance upgrades are designed to get more from your vehicle, improving power, efficiency and drivability without compromising reliability.

Developed with real-world 4x4 use in mind, the range focuses on strengthening key systems and optimising airflow, cooling and drive train performance for demanding conditions.

From engine and intake upgrades to heavy-duty driveline components and traction solutions, each product is engineered to work as part of a complete system.

Whether enhancing everyday usability, supporting heavy loads or building a high-performance off-road vehicle, Terrafirma performance components deliver increased capability with confidence.

PERFORMANCE | EQUIPMENT |

RED BOOSTER CLUTCH SERVOS

The Red Booster servo clutch kit makes the clutch on your Defender much easier to depress making your driving a more pleasurable experience and reducing the effort required particularly when manoeuvring or in stop start traffic.

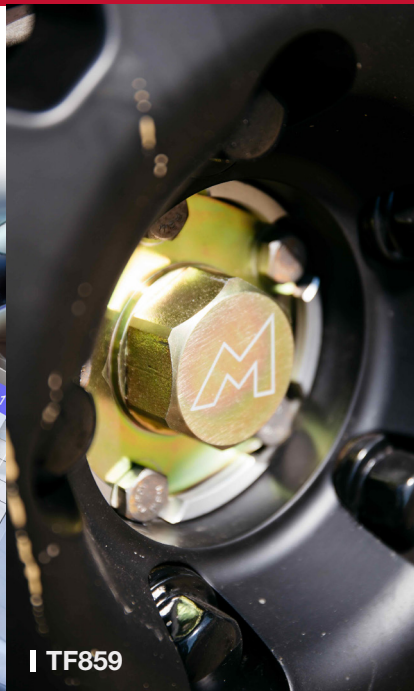

It is mounted between the pedal and master cylinder and uses a vacuum from the inlet manifold to reduce the amount of pressure needed on the pedal to operate the clutch.

DRIVELINE & AXLE

Increase strength and reliability when handling higher torque and off-road stress.

- Heavy duty drive flanges
- Wide Angle & Double Cardan propshafts
- Heavy duty halfshafts & CV joints

EXPLORING THE WILD BEYOND.

Land Rover vehicles have long been associated with exploration, built to travel further and tackle terrain where others cannot. From remote deserts to mountain trails, expedition driving demands more than just capability. It requires reliability, preparation and the right equipment to support extended journeys away from civilisation.

Terrafirma expedition equipment is designed to enhance self-sufficiency and practicality, allowing vehicles to carry more gear, travel further and operate confidently in remote environments. The range focuses on durability and usability, ensuring essential equipment is secure, accessible and able to withstand harsh conditions.

Products such as roof racks, roof tents and storage solutions maximise space and organisation, while access equipment including ladders and steps improve usability in everyday scenarios. Auxiliary lighting enhances visibility in low-light conditions, and mounting systems allow additional equipment to be fitted safely and securely.

Every product is developed with real-world expedition use in mind, balancing strength, weight and functionality. Whether preparing for a weekend camping trip or a long-distance adventure, Terrafirma expedition equipment enables Land Rover owners to explore with confidence, comfort and capability.

Every product is developed with real-world expedition use in mind, balancing strength, weight and functionality.

TF1038
Raised Air Intake

EXPEDITION EQUIPMENT

Wherever your adventures take you, Terrafirma has everything needed to make your expedition a success.

ROOF RACKS

Terrafirma roof racks are designed to maximise carrying capacity and make the most of your vehicle's available space, essential for expedition travel where storage is critical.

Our Range Includes:

- Alloy Expedition Roof Racks
- Tubular Roof Racks
- Roof Rack Accessories including brackets and mounting points
- Roof Rack Ladders

TF1714 270 Deg 2/5 Terradactyl Awning

AWNINGS

Designed for durability and ease of use, Terrafirma awnings are built from robust, weather-resistant materials with strong support frames to withstand wind and rain. Compact when stored and simple to mount, they offer a practical solution for increasing comfort and usability on any journey.

- Expedition Awnings
- Hard Case Awnings
- Terradactyl Awnings
- Shower Awnings

EXPEDITION & CAMPING ACCESSORIES

Covering practical solutions for storage, shelter, cooking and vehicle setup, the range helps maximise available space while keeping essential equipment secure and easily accessible.

TERRACANS

The next generation of fuel and water containers, ensuring you are prepared for your next expedition.

- High grade LLDPE Plastic
- Includes pouring spout and breather
- Stackable & lockable
- Various mounting systems available

SAND TRACKS & RECOVERY BOARDS

An essential piece of expedition kit.

- Alloy sand tracks or nylon recovery boards available
- Lightweight & easy to handle

RAISED AIR INTAKE & TRANSMISSION BREATHER KITS

Protect your engine in demanding off-road conditions.

- Modern styling & aerodynamic features
- Durable, UV & temperature stable

AIR COMPRESSORS

- Essential for quick and convenient tyre inflation on and off-road
- Allows easy adjustment of tyre pressures for different terrains
- Durable construction designed for regular use in harsh conditions
- Compact and easy to store for expedition and everyday use
- Air hose tools available

I TF5545 Terrafirma X-Hinge Roof Tent

TERRAFIRMA X-HINGE ROOF TENT

- Strong, lightweight aluminium shell
- Third rear X-hinge for added stability
- Two large side windows and a skylight
- 600D ripstop canvas (280gsm)
- Sleeps two adults
- Built-in 70mm "cool feel" mattress
- Built-in dual-colour LED light

SPARE WHEEL CARRIERS

Terrafirma spare wheel carriers are designed to securely support larger, heavier spare wheels, reducing stress on the vehicle's rear door and hinges. Ideal for off-road and expedition vehicles, they provide a stronger, more reliable mounting solution when running oversized tyres.

INTERIOR UPGRADES

I GI219

TerraFirma interior upgrades are a range of accessories to improve the look and feel of your vehicle.

INTERIOR ENHANCEMENTS

TerraFirma have an expertly selected range of interior enhancements to improve the comfort and style of your Land Rover.

- Load Space Parcel Shelf
- Defender Drawer Units
- Air Conditioning Kits
- Electric Windows
- Reversing Camera

STEERING WHEELS & GEAR LEVER KNOBS

Improve driver comfort and vehicle style by updating your steering wheel or gear lever knobs.

- Stylish Upgrades
- Durable Alloy options

INTERIOR STORAGE

Increase the interior storage of your Land Rover without cramping the driving space.

- ✓ **Roof Console**
- ✓ **Parcel Shelves**

- Seat Covers
- Bulkhead Removal Bars
- Seat Box Protectors
- Seatbelts
- Seat Risers

LIGHTING UPGRADES

- LED Wing Mirrors
- LED Light Bars
- LED Grille Lighting Kits
- High Intensity Spot Light

HAZARD & MULTI LIGHTS

Ideal for recovery, rescue, plant and agriculture purposes.

- Multiple Flash Patterns
- Variety of Colours
- Endless Options of Combinations

LIGHT MOUNTS

Mount your lights without drilling bodywork with Terrafirma's smart mounting solutions.

- Bulkhead Mounts
- Bumper Mounts
- Anti Theft Mounts
- Number Plate Mounts
- Fairled Mounts
- Roof Light Bars
- Roof Rack Mounts

TERRAFIRMA HALO & BAR LED HEADLIGHTS

The stylish Halo & Bar style illumination brings a unique look as well as incredible lighting performance for your Defender, Series or Range Rover Classic.

- Built into metal housing for maximum durability
- Standard Beam Pattern

TERRAFIRMA HALO & BAR LED COMPLETE KITS

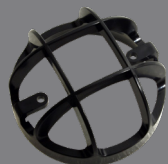

Halo and Bar lights are available in the classic 73mm with 95mm reverse and fog lights as well as the larger full set of 95mm lights.

- Available in coloured, clear or smoked
- Direct 'plug & play'
- Replacement flasher relay corrects flash speed
- Compliment with sequential or dynamic side repeaters

LIGHT GUARDS

Protect your valuable lights from accidental damage.

MULTI FUNCTION 8 WAY SWITCH PANEL SYSTEM

Control 8 lighting devices via one panel mounted in the cab.

- Simplifies LED installation
- Customisable touch screen
- Mounting kit included

TF7010

MAGFLEX LIGHTS

Quality lighting solutions for workshop technicians.
